(54) LIPSTICK COMPOSITION

(57)Abstract:

PROBLEM TO BE SOLVED: To obtain a lipstick composition which scarcely fades the color, has a good makeup-lasting property, does not give an uncomfortable touch such as a dry touch when used, and hardly changes with the passage of time, by including gluten or its component: glutenin or gliadin.

SOLUTION: This lipstick composition contains gluten (a vegetable protein extracted from the seeds of a grain such as wheat or rye) or its component: glutenin or gliadin preferably in an amount of 0.1 to 50 wt.%. The lipstick composition is preferably a non-aqueous lip stick composition which does substantially not contain water and is obtained by adding the gluten or its component: glutenin or gliadin to essential components comprising 1 to 90 wt.% of a liquid oily raw material (for example, liquid paraffin, jojoba oil, castor oil, isopropyl myristate or dimethylpolysiloxane) and 0.1 to 50 wt.% of a coloring agent (for example, a legal pigment for lipsticks, titanium dioxide or nylon powder).
